

Direct Access Audiology for Tinnitus and Hearing Loss in Adults

Referral

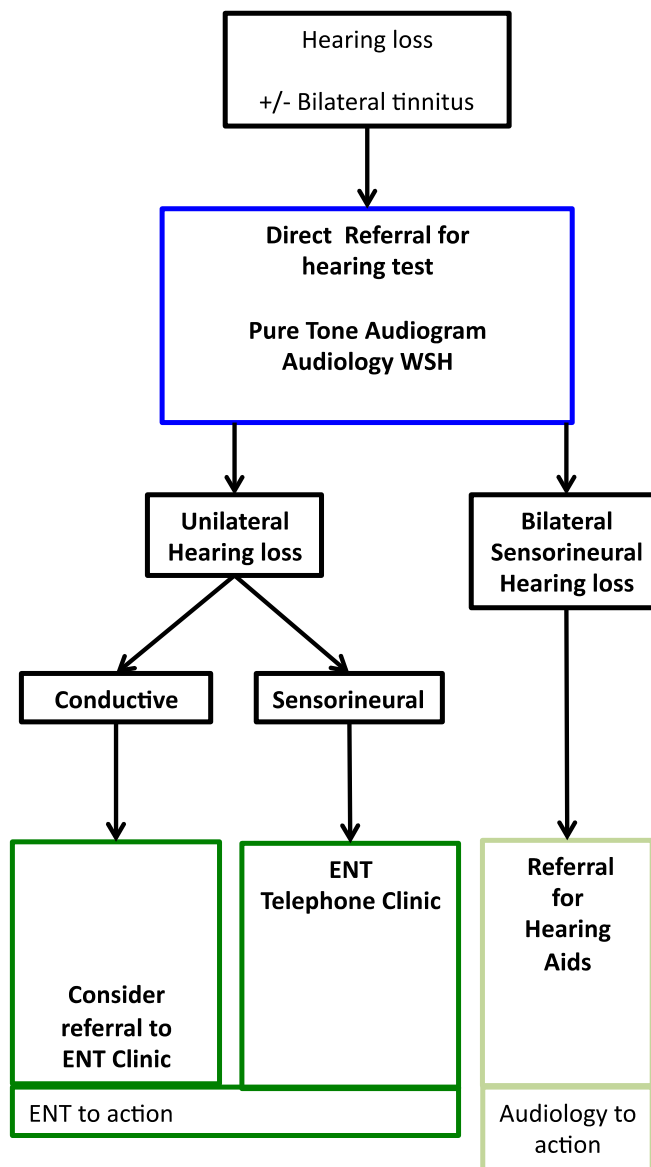

- Patients with non-acute hearing loss (developed gradually over period >72 hours) with or without Tinnitus.

Patients must fit the following criteria:

- Adult patient (>18 years of age)
- History - no other symptoms, such as vertigo, otalgia, otorrhoea
- Examination – able to see normal tympanic membranes bilaterally

Referrals can be made via e-referral directly into the **Audiology Triage Service** appointment slot.

If the patient fits the criteria follow instructions in the pathway:

NB Use direct referral for hearing aids for adults (age >55 years) asymptomatic bilateral hearing loss
